

# Protecting your **employees**, your **customers**, and your **brand** with temperature scanning technology

Who knew we would be **taking temperatures as a precautionary measure** for our employees and customers? Figuring out what technology to use to monitor and capture temperatures is something you likely have not been in the market for in the recent past. Good news is that **Bailiwick has done the research** for you and **partnered with leading technology manufacturers to provide you with the ideal solution.**

We can **assess your needs, recommend the right solutions, provide asset distribution services, manage distribution.** And, **we can do it fast**, which counts with COVID-19.

## How Thermal Cameras **help prevent** the spread of a virus

- Align the right technology with the right process to keep your facility and sites safe.
- Identify employees who have a high-temp prior to them entering the facility and engaging with other employees or customers.
- Help alert employees who may not know they have a high-temp so they can pursue further COVID-19 testing.
- Offer a touch-free technology solution that keeps employees and customers safer.
- Provide a more efficient process that reduces false positives.

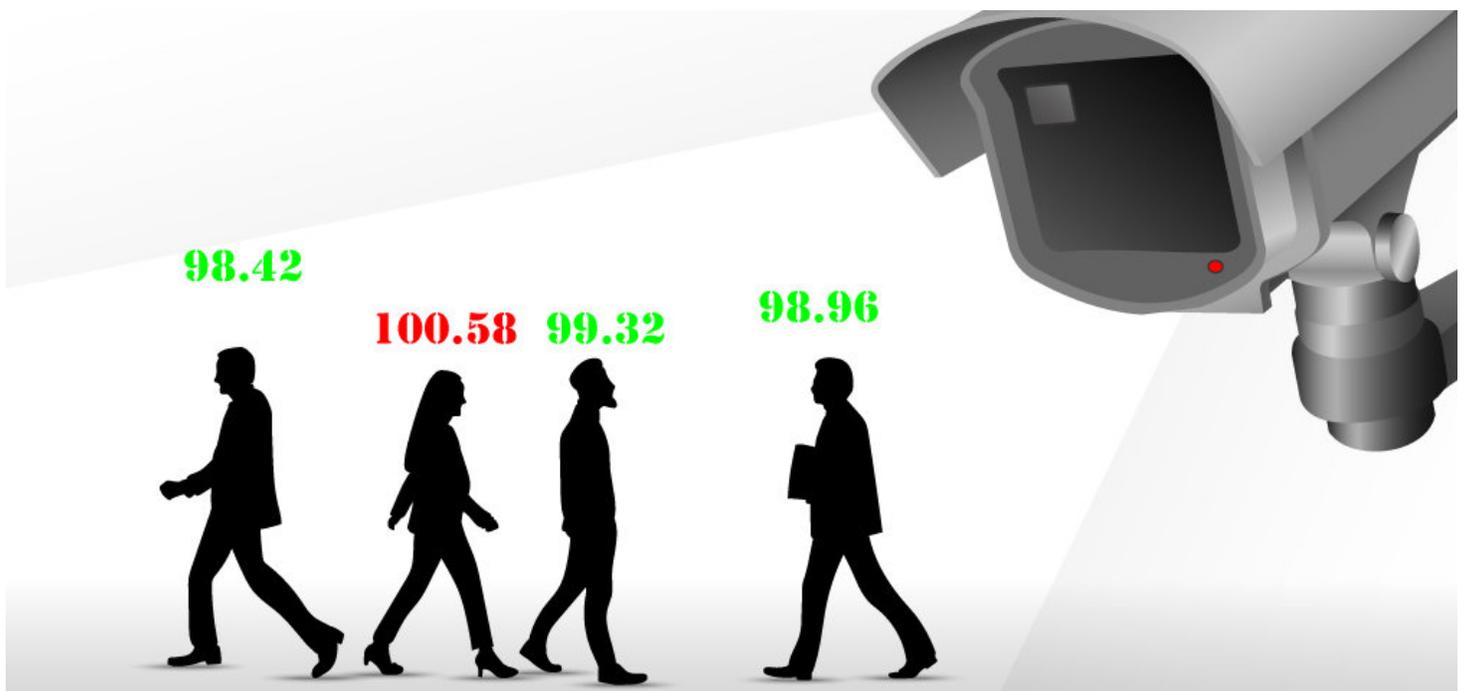

**LET'S GET STARTED**

## Technology makes a difference!

Bailiwick learned first-hand about the challenges of hand-held scanners. While they are accurate, they can be inefficient and disruptive to our operation. That caused us to do more research and learn about the benefits of camera temperature scanning versus hand-held.

We are **ready to help you design the ideal solution, procure equipment, and install temperature checking stations** at both corporate and site locations.

We have solutions that converge multiple needs for technology. For example, camera solutions that **measure body temperature and: facial recognition, mask detection and people counting.**

### AN **INDIVIDUALIZED & INTEGRATED** SOLUTION

Bailiwick is your true end-to-end partner. We'll have your back, from designing a great plan to maintaining a reliable solution.

Solution Design and Procurement	Essential Supplier	Implementation
<p>We get it. You are problem solving on multiple fronts. There are ways to converge several solutions into one technology. We can help!</p>	<p>Bailiwick has been recognized as an "essential supplier" as defined by the DHS. We can continue to serve no matter the circumstances.</p>	<p>Exceptional project management of deployment and installation. Bailiwick has a flexible, mobile labor force of nation-wide technicians.</p>
