

## Add EV charging to your list of amenities.

The window to electrify early won't last forever. Capitalize with Bailiwick EV Charging Solutions.

Today, EV charging stations are seen as an amenity that's nice to have. Tomorrow, guests will require the presence of an EV charging station before considering where to stay. With thoughtful planning and installation of EV charging stations, you'll improve customer experience and make your property a preferred destination.

Investing in EV charging stations is an investment in the future of your property. In 2022, 5.6% of all vehicles purchased in the US were electric. By 2030, there is projected to be 26.4 million electric vehicles on US roads.

HOSPITALITY SOLUTIONS

### Increase and protect property value.

You will help maintain or increase the value of your investment by giving guests an increasingly expected feature.

### Create a great guest experience.

EV charging stations will set your property apart from others by providing a valuable amenity to guests looking for an all-inclusive experience.

### Be a sustainability leader.

Electric vehicles reduce carbon emissions, creating a more environmentally friendly option than internal combustion engines.

## Electrify your business with Bailiwick.

The EV charging industry is accelerating. Bailiwick can help you adapt by providing EV charger planning and installation services.

With over 15,000 site installations, 1.5 million feet of electrical wiring installed and over 30 million pounds of concrete poured, Bailiwick has a proven track record for executing large-scale, multi-site installation projects. It's the kind of experience you can count on to handle the most important details for your technology-based projects.

With Bailiwick, you get a national network of expert installers and the robust infrastructure of IT integration support. Bailiwick performs complex installation projects throughout North America. With more than 25 years of IT infrastructure installations, we're ready to prepare your business for the future.

### Bailiwick's Four-Phase Approach to EV Charging Installation

Bailiwick offers a fully integrated process for companies looking to add EV charging stations. Our four-phase approach ensures clients receive diligent care of their EV charging initiatives from the preliminary planning stage, through installation and maintenance.

#### Phase I:

##### **Consultation**

*Meet with clients to understand their EV strategy and their goals and objectives.*

#### Phase II:

##### **Site Evaluation**

*Visit site to determine any infrastructure needs and develop a thorough installation plan.*

#### Phase III:

##### **Turnkey Installation and Activation**

*Bailiwick's on-site installation crew works along with our best-in-class project management team to ensure quality work at every step until activation.*

#### Phase IV:

##### **Maintenance and Repair**

*Our vast network of skilled technicians is a phone call away for maintenance and repair of damaged units.*
