• EV Charging Solutions

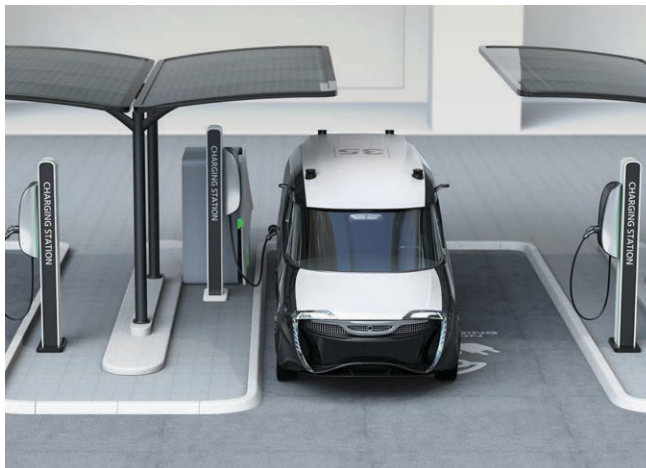

## Keep your EV fleet fueled.

The window to electrify early won't last forever. Capitalize with Bailiwick EV Charging Solutions.

LOGISTIC SOLUTIONS

EVs are having a profound impact on the logistics industry. More companies are integrating EVs into their fleets because of the versatility and efficiency they provide. The growth in the use of EVs is making charging stations a necessity. Now is the time to implement or expand upon your EV charging station infrastructure—Bailiwick can help.

Efficiency is the most crucial factor for any logistics provider. Whether you deliver packages or move inventory, a fleet of electric vehicles can help streamline your operations. Ensure that you have the charging capacity to keep your vehicles rolling—EV charging stations are the solution it takes.

### Be a sustainability leader.

Electric vehicles reduce carbon emissions, creating a more environmentally friendly option than internal combustion engines.

### Get a competitive edge.

Separate your business from competitors by making your company more sustainable.

### Reap the rewards.

You may qualify for government incentives while lowering operation and maintenance costs.

## Electrify your business with Bailiwick.

The EV charging industry is accelerating. Bailiwick can help you adapt by providing EV charger planning and installation services.

With over 15,000 site installations, 1.5 million feet of electrical wiring installed and over 30 million pounds of concrete poured, Bailiwick has a proven track record for executing large-scale, multi-site installation projects. It's the kind of experience you can count on to handle the most important details for your technology-based projects.

With Bailiwick, you get a national network of expert installers and the robust infrastructure of IT integration support. Bailiwick performs complex installation projects throughout North America. With more than 25 years of IT infrastructure installations, we're ready to prepare your business for the future.

### Bailiwick's Four-Phase Approach to EV Charging Installation

Bailiwick offers a fully integrated process for companies looking to add EV charging stations. Our four-phase approach ensures clients receive diligent care of their EV charging initiatives from the preliminary planning stage, through installation and maintenance.

#### Phase I:

##### **Consultation**

*Meet with clients to understand their EV strategy and their goals and objectives.*

#### Phase II:

##### **Site Evaluation**

*Visit site to determine any infrastructure needs and develop a thorough installation plan.*

#### Phase III:

##### **Turnkey Installation and Activation**

*Bailiwick's on-site installation crew works along with our best-in-class project management team to ensure quality work at every step until activation.*

#### Phase IV:

##### **Maintenance and Repair**

*Our vast network of skilled technicians is a phone call away for maintenance and repair of damaged units.*
