

Add EV charging to the menu.

The window to electrify early won't last forever. Capitalize with Bailiwick EV Charging Solutions.

Electric vehicle sales will represent 60% of all new car purchases by 2030. Customers may make their dining decisions based on the availability of EV charging stations. Now is the time to implement or expand upon your EV charging station infrastructure—Bailiwick can help.

Convenience is important for anyone who visits a quick service restaurant or coffee shop. Your customers want fast ways to refuel—both their energy levels and their vehicles. For EV drivers, a restaurant with charging stations is more appealing than one without. Ensure that yours is on their radars.

Be the convenient choice.

EV drivers prefer shorter activities while their vehicle is charging.

Keep customers happy.

EV charging stations attract customers looking for routine charging stops.

Be a sustainability leader.

Electric vehicles reduce carbon emissions, creating a more environmentally friendly option than internal combustion engines.

Electrify your business with Bailiwick.

The EV charging industry is accelerating. Bailiwick can help you adapt by providing EV charger planning and installation services.

With over 15,000 site installations, 1.5 million feet of electrical wiring installed and over 30 million pounds of concrete poured, Bailiwick has a proven track record for executing large-scale, multi-site installation projects. It's the kind of experience you can count on to handle the most important details for your technology-based projects.

With Bailiwick, you get a national network of expert installers and the robust infrastructure of IT integration support. Bailiwick performs complex installation projects throughout North America. With more than 25 years of IT infrastructure installations, we're ready to prepare your business for the future.

Bailiwick's Four-Phase Approach to EV Charging Installation

Bailiwick offers a fully integrated process for companies looking to add EV charging stations. Our four-phase approach ensures clients receive diligent care of their EV charging initiatives from the preliminary planning stage, through installation and maintenance.

Phase I:

Consultation

Meet with clients to understand their EV strategy and their goals and objectives.

Phase II:

Site Evaluation

Visit site to determine any infrastructure needs and develop a thorough installation plan.

Phase III:

Turnkey Installation and Activation

Bailiwick's on-site installation crew works along with our best-in-class project management team to ensure quality work at every step until activation.

Phase IV:

Maintenance and Repair

Our vast network of skilled technicians is a phone call away for maintenance and repair of damaged units.
