• EV Charging Solutions

## Take charge of the future of retail.

The window to electrify early won't last forever. Capitalize with Bailiwick EV Charging Solutions.

Electric vehicle sales will represent 60% of all new car purchases by 2030. Their growth is outpacing the adoption of public charging stations. Now is the time to implement or expand upon your EV charging station infrastructure—Bailiwick can help.

Customer perception plays a critical role for any retailer. The businesses that provide on-site EV charging stations are positioned to leave positive impressions on customers. The amenity adds convenience to store visits while demonstrating a commitment to sustainable fuel sources. What's more, employees are sure to appreciate the convenient addition.

RETAIL SOLUTIONS

### Be the convenient choice.

Studies suggest that some EV drivers enjoy short activities such as shopping while their vehicles are charging.

### Increase cart sizes.

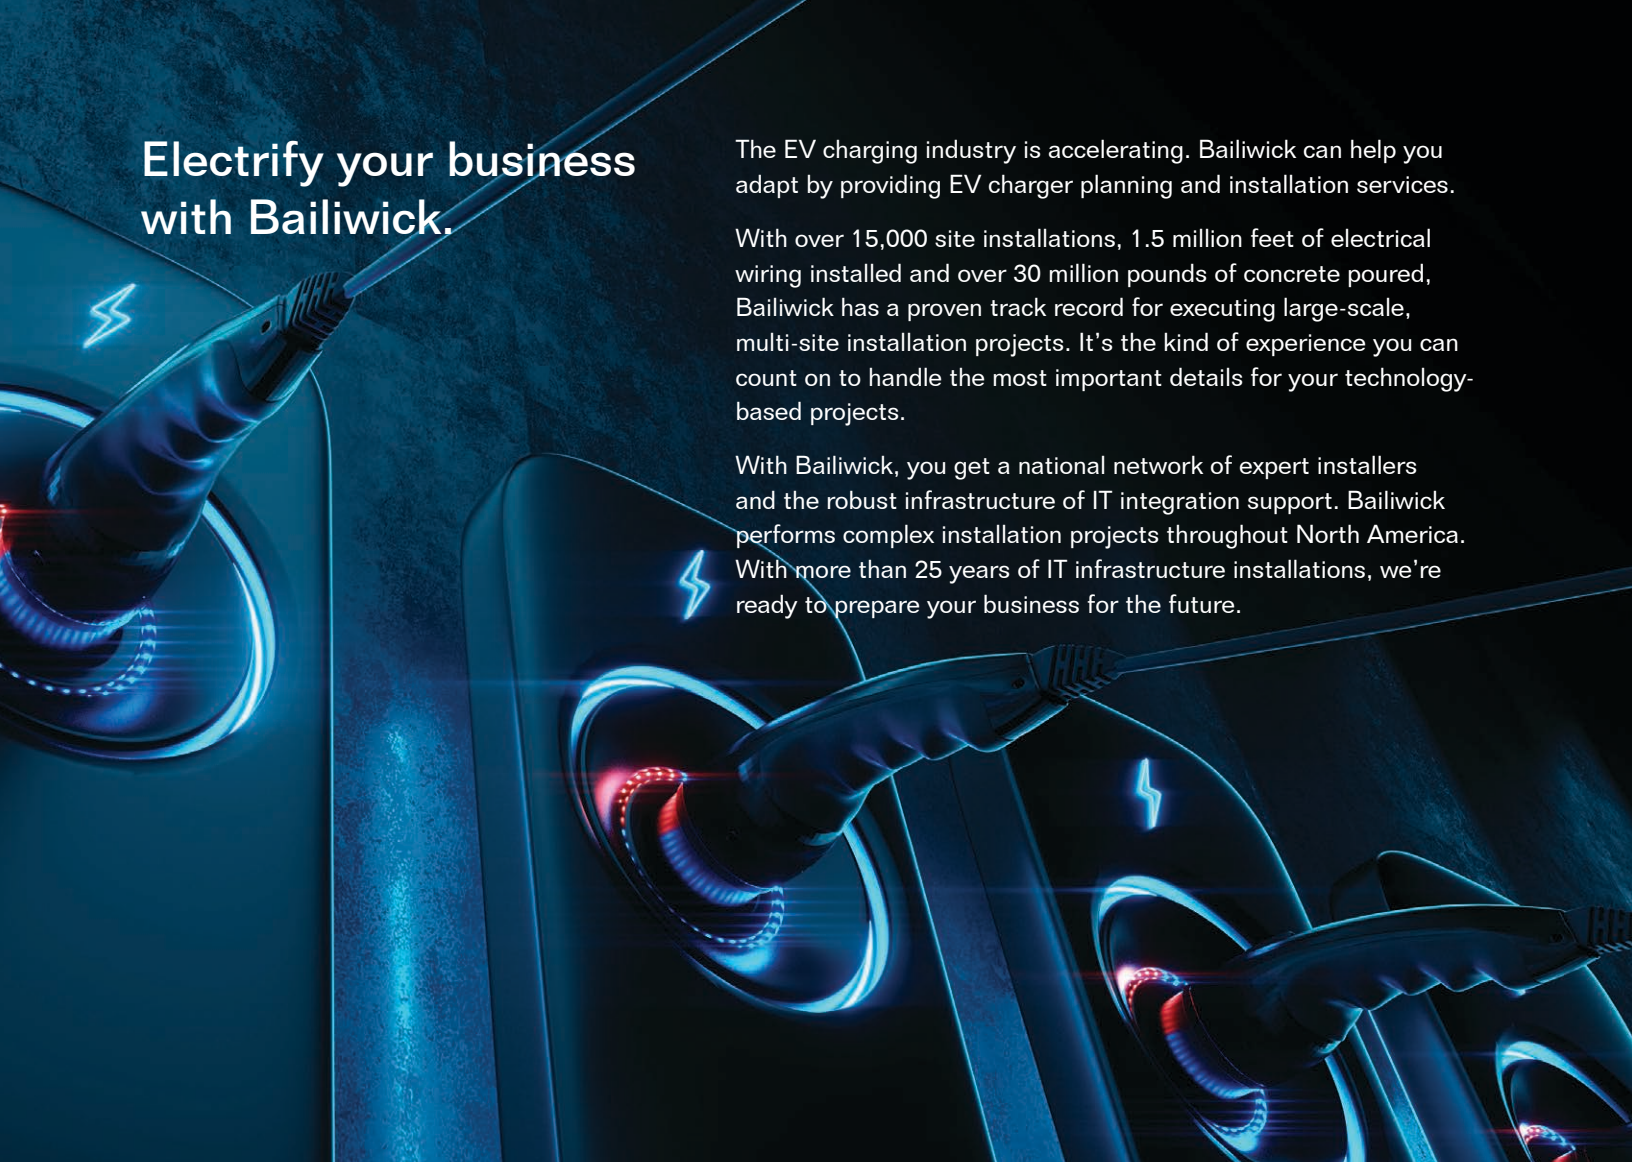

89% of EV drivers make a purchase while charging at a retail location.\*

### Keep customers happy.

EV charging stations attract customers looking for routine charging stops.

## Electrify your business with Bailiwick.

The EV charging industry is accelerating. Bailiwick can help you adapt by providing EV charger planning and installation services.

With over 15,000 site installations, 1.5 million feet of electrical wiring installed and over 30 million pounds of concrete poured, Bailiwick has a proven track record for executing large-scale, multi-site installation projects. It's the kind of experience you can count on to handle the most important details for your technology-based projects.

With Bailiwick, you get a national network of expert installers and the robust infrastructure of IT integration support. Bailiwick performs complex installation projects throughout North America. With more than 25 years of IT infrastructure installations, we're ready to prepare your business for the future.

### Bailiwick's Four-Phase Approach to EV Charging Installation

Bailiwick offers a fully integrated process for companies looking to add EV charging stations. Our four-phase approach ensures clients receive diligent care of their EV charging initiatives from the preliminary planning stage, through installation and maintenance.

#### Phase I:

##### **Consultation**

*Meet with clients to understand their EV strategy and their goals and objectives.*

#### Phase II:

##### **Site Evaluation**

*Visit site to determine any infrastructure needs and develop a thorough installation plan.*

#### Phase III:

##### **Turnkey Installation and Activation**

*Bailiwick's on-site installation crew works along with our best-in-class project management team to ensure quality work at every step until activation.*

#### Phase IV:

##### **Maintenance and Repair**

*Our vast network of skilled technicians is a phone call away for maintenance and repair of damaged units.*
