

Looking for an IT Integration Center that will exceed expectations?

Bailiwick's IT integration and configuration center manages asset logistics for some of the most trusted brands in the world. That's because they trust Bailiwick to deliver exceptional value. As your managed IT services partner, Bailiwick will deliver best-in-class service for field technicians. We will also service and protect your valuable assets before they are sent to sites for installation.

Bailiwick's new state-of-the art inventory storage and configuration services center is second to none. With more than 214,000 square feet of warehouse and configuration space, Bailiwick has become the preferred IT solutions partner for some of the world's most recognizable brands that require multi-site managed IT solutions.

Configuration and Consolidation Services

Our configuration services prepare digital assets for use before they are sent to the field, ensuring a smoother installation process. The service saves companies time and money since Bailiwick ensures field technicians receive equipment that has been configured, inspected and is ready for use.

Asset Lifecycle Management

The ability to accurately track valuable assets is critical to the success of any large multi-site IT integration project. Bailiwick uses the latest warehousing technologies to track inventory at greater than 99.9% accuracy. We also update and redeploy equipment and safely dispose of unusable assets.

Innovation and Integration Lab

This unique laboratory allows Bailiwick engineers to test how complex installation projects can be simplified in the field, allowing technicians to focus on installing systems, not troubleshooting device issues.

DELIVERING RESULTS WITH BEST-IN-CLASS INTEGRATION CENTER

- ✓ Total customer solution with one phone call
- ✓ Work with all major carriers
- ✓ Scalable to manage large multi-site projects
- ✓ Build and ship project kits directly to installation sites throughout North America

“We appreciate Bailiwick’s scalability and attention to detail. Their employees never let a detail slip throughout every critical step in the process.”

— IT Deployment Director for National Retailer

Bailiwick is a full-solution IT partner that provides Total Site Care to help simplify IT support and drive business results.
