

## Smart Locks. Trusted Solutions.

### Patent-Pending, Game Changing Innovation

Bailiwick's **Digital Lock Solutions** give you control, visibility, and peace of mind. Our solution provides product protection without creating friction for customers or slowing employees down. Digital credentials replace physical keys; future ready with integrated AI and analytics.

### With encrypted digital locks, you can:

- ✓ Control who opens what, when, and for how long.
- ✓ Revoke or reassign access instantly.
- ✓ Generate detailed audit trails for compliance and accountability.

### Smart Integration for an Integrated Operation

Bailiwick's digital locking platform integrates seamlessly with your existing systems for true operational insight and control.

#### Software Integrations

Works with your loyalty and workforce applications.

#### Flexible Access Options

Can unlock via mobile app or organization-issued device.

#### AI Enabled

Designed to incorporate current and future AI applications.

#### ADA Compliant

Designed to meet accessibility requirements for all environments.

#### Visibility & Insights

Gain real-time visibility into employee activity and lock status.

#### No network required

Locks operate securely without Wi-Fi or internet connectivity.

## Customizable Designs for Specialized Uses

Bailiwick meets clients at the front edge of innovation and helps them bring big ideas to life. In addition to executing solutions, we invent them.

**Industrial-grade door handle locks**

**Small format interchangeable core (SFIC)**

**Armored, digital padlock**

## Enterprise-Grade Security and Simplicity

The cybersecurity designed into our digital locks incorporates encrypted chip controllers that provide unparalleled security, ensuring that locks are opened only by those with permission from the administrator. This technology has seen more than 60,000 installations and 25 million digital keys deployed, proving reliability for large-scale enterprise deployments.

## Bailiwick delivers a turnkey, fully managed experience

- Procurement, installation, monitoring, and maintenance
- 24x7 service desk and proactive alerting
- Low-battery and lock-status notifications
- Access profile management and temporary key creation
- Subscription-based support with full lifecycle management

## Powerful Benefits for Modern Businesses

### Enhanced Security

Advanced encryption, biometric and PIN authentication, and reprogrammable access.

### Eliminate Key Hassles

No more physical keys to track, copy, or replace.

### Flexible Access Control

Assign permissions by user, role, or time window.

### Audit & Reporting

Monitor who accessed secured areas and when.

### Cost Efficiency

Reduce re-keying, maintenance, and theft-related losses.

*The padlock opens using your personal or organization-issued devices.*
